

Impax Environmental Markets plc holdings	Description
A. O. Smith Corporation	A. O. Smith Corp. manufactures residential and commercial water heating equipment and air purification products. It operates through the North America and Rest of World segments. The North America segment manufactures and globally markets specialty commercial water heating equipment, condensing and non-condensing boilers, and water systems tanks. The Rest of World segment comprises of China, Europe, and India; and manufactures and markets water treatment products. The company was founded by Charles Jeremiah Smith in 1874 and is headquartered in Milwaukee, WI.
Acuity brands	Acuity Brands, Inc. provides lighting and building management solutions. It specializes in the design, production, and distribution of lighting and building management services for commercial, institutional, industrial, infrastructure, and residential applications for various markets throughout North America and selected international markets. It offers luminaires, lighting controls, controllers for various building systems, power supplies, prismatic skylights, and drivers, as well as integrated systems for various indoor and outdoor applications. The company was founded in 2001 and is headquartered in Atlanta, GA.
Advanced Drainage Systems	Advanced Drainage Systems, Inc. engages in the manufacture of thermoplastic corrugated pipe which provides suite of water management products and superior drainage solutions for use in the construction and infrastructure marketplace. It operates through the following segments: Domestic and International. The Domestic segment focuses on the manufacture and sale of products throughout the United States. The International segment concerns the manufacture and sale of products in regions outside of the United States. The company products include corrugated high density polyethylene pipe, polypropylene pipe and related water management products. Advanced Drainage Systems was founded in 1966 and is headquartered in Hilliard, OH.
Advantech	Advantech Co., Ltd. engages in the provision of system integration solutions. Its products include industrial control and control products; industrial computer and workstations; embedded computer card; and ultra-thin liquid crystal display computer. The company was founded by Tienchung Chen, Chunsheng Ho, and Kochen Liu on September 7, 1981 and is headquartered in Taipei, Taiwan.
American Water Works Company	American Water Works Co., Inc. engages in the provision of complementary water and wastewater services. It operates through regulated businesses division, which includes the ownership of subsidiaries that provide water and wastewater utility services to residential, commercial, industrial and customers, including sale for resale and public authority customers. The company was founded in 1886 and is headquartered in Voorhees, NJ.
Amiad Water Systems	Amiad Water Systems Ltd. engages in the provision of water treatment filtration systems. It operates through the following segments: Irrigation, Industrial, Municipal, Oil & Gas, and Ballast Water. Its products include fertigation injectors and automatic, semi-automatic and manual filters. It distributes its products

	<p>under the Arkal, Filtomat, and Amiad brands. The company was founded in 1962 and is headquartered in Kibbutz Amiad, Israel.</p>
Arcadis	<p>Arcadis NV operates as a global design and consultancy firm that provides consultancy, design, engineering and management services. It focuses its services on buildings, environment, infrastructure, and water business lines. It operates through the following segments: Americas, Europe and Middle East, Asia Pacific, and Callison RTKL. The company was founded in 1888 and is headquartered in Amsterdam, the Netherlands.</p>
Badger Meter	<p>Badger Meter, Inc. engages in the provision of flow measurement, control products, and communications solutions that serves water utilities, municipalities, and commercial and industrial customers worldwide. Its products are classified into two categories: Municipal Water and Flow Instrumentation. Municipal water products comprises of water meters and related technologies to municipal water utilities. Flow Instrumentation products includes meters and valves sold worldwide to various industries for water and other fluids. The company was founded in 1905 and is headquartered in Milwaukee, WI.</p>
Beijing Enterprises Water Group	<p>Beijing Enterprises Water Group Ltd. is an investment holding company, which engages in the construction of sewage and reclaimed water treatment and seawater desalination plants. It operates through the following segments: Sewage and Reclaimed Water Treatment and Construction Services; Water Distribution Services; and Technical and Consultancy Services. The Sewage and Reclaimed Water Treatment and Construction Services segment engages in the construction and operation of sewage and reclaimed water treatment plants, the construction of a seawater desalination plant, and the provision of construction services for comprehensive renovation projects. The Water Distribution Services distributes and sells piped water and provides related services. The Technical and Consultancy Services provides consultancy services and sells machineries related to sewage treatment and construction services for comprehensive renovation projects, and licenses technical know-how to sewage treatment. The company was founded on November 23, 1992, and is headquartered in Hong Kong.</p>
Brambles	<p>Brambles Ltd. engages in the provision of supply chain support services and information management solutions. It provides pallet and container pooling solutions through the CHEP and IFCO brands. It provides pooling Solutions and associated services, focusing on the outsourced management of returnable pallets, crates and containers. The company operates through the following segments: Pallets-Americas, Pallets-EMEA, Pallets-Asia-Pacific, Reusable Plastic Crates, Containers, and Corporate. . The Pallets segment comprises of all CHEP pallet operations in three regions, including the IFCO pallet management services business in the U.S. and the lean logistics business in Europe and Asia-Pacific. The Reusable Plastic Crates segment provides reusable plastic crates operations under both the IFCO and CHEP brands. The Containers segment comprises of global intermediate bulk container and automotive container operations,</p>

	the CHEP catalyst and chemical containers business and the newly-formed CHEP aerospace solutions. The company was founded by Walter Edwin Bramble in 1875 and is headquartered in Sydney, Australia.
California Water Service Group	California Water Service Group is a holding company, which engages to provides water utility and other related services in California, Washington, New Mexico, and Hawaii through its wholly-owned subsidiaries. The company is involved in the production, purchase, storage, treatment, testing, distribution and sale of water for domestic, industrial, public, and irrigation uses, as well as for fire protection. It also provides non-regulated water-related services under agreements with municipalities and other private companies. The company was founded in 1926 and is headquartered in San Jose, CA
Clean Harbors	Clean Harbors, Inc. engages in the provision of environmental, energy, and industrial services. It operates through the following segments: Technical Services; Industrial and Field Services; Kleen Performance Products; SK Environmental Services; Lodging Services; and Oil and Gas Field Services. The Technical Services provides a range of hazardous material management services including the packaging, collection, transportation, treatment, and disposal of hazardous and non-hazardous waste. The Industrial and Field Services offers industrial and specialty services such as high-pressure and chemical cleaning, catalyst handling, decoking, material processing, and industrial lodging services. The Kleen Performance Products processes used oil into high quality base and blended lubricating oils which are then sold to third party customers. The SK Environmental Services consists of Safety-Kleen's branches and provides a broad range of environmental services. The Lodging Services deals with lodges and remote workforce accommodation facilities throughout Western Canada. The Oil and Gas Field Services involves the fluid handling, fluid hauling, production servicing, surface rentals, seismic services, and directional boring services. The company was founded by Alan S. McKim in 1980 and is headquartered in Norwell, MA.
Sabesp	Companhia de Saneamento Basico do Estado de Sao Paulo SABESP engages in the provision of basic and environmental sanitation services. The company operates through the following segments: Water and Sewage. It activities include water supply, urban rainwater management and sanitary sewage, drainage, urban cleaning, and solid waste management services. The company was founded on September 6, 1973 and is headquartered in São Paulo, Brazil.
Coway	Coway Co., Ltd. engages in the manufacture and sale of household electronic appliances. Its products include water purifiers, air purifiers, bidet, water softeners, and mattresses. The company was founded on May 2, 1989 and is headquartered in Gongju, South Korea.
Delta Electronics (Thailand)	Delta Electronics (Thailand) Public Co. Ltd. engages in the manufacture and export of power supplies and other electronic equipment. The firm operates through the following business segments: Power Electronics. Energy Management, Smart Green Life, and Others. The Power Electronics segment designs, manufactures, and sells power supplies applied to computer, server, office automation equipment, household electric appliances, and automotive electronic products. The Energy Management segment

	<p>offers telecom power system; industrial power system; uninterruptible power supplies (UPS), photovoltaic inverter (PIV), and industrial automation products. The Smart Green Life segment comprises of light-emitting diode lighting product and display solutions. The Others segment includes other activities. Its products include adapter, direct current-alternate current converter, power supplies, telecom power solutions, and cooling fans. The company was established on June 16, 1988 and is headquartered in Amphur Muangsamutprakarn, Thailand.</p>
Dialight	<p>Dialight Plc is a holding company, which engages in applied light emitting diode (LED) technology business. It operates through the Lighting and Signals and Components segments. The Lighting segment develops, manufactures, and supplies LED lighting solutions for hazardous and industrial applications. The Signals and Components segments develop, produce, and supply status indication components for electronics OEMs, together with niche industrial and automotive electronic components and highly efficient LED signalling solutions for the traffic and signals markets. The company was founded by Harry Leonard Tee on March 28, 1990 and is headquartered in Newmarket, the United Kingdom.</p>
Donaldson Company	<p>Donaldson Co., Inc. engages in the manufacture of filtration systems and replacement parts. Its product mix includes air and liquid filtration systems and exhaust and emission control products. It operates through the Engine Products and Industrial Products segments. The Engine Products segment consists of air filtration systems, exhaust and emissions systems, liquid filtration systems, and replacement filters. The Industrial Products segment consist of dust, fume, and mist collectors, compressed air purification systems, air filtration systems for gas turbines, PTFE membrane-based products, and specialized air filtration systems for applications including computer hard disk drives and semi-conductor manufacturing. The company was founded by Frank Donaldson in 1915 and is headquartered in Minneapolis, MN.</p>
DS Smith	<p>DS Smith Plc operates as a holding company, which provides corrugated packaging solutions throughout Europe as well as plastic packaging solutions worldwide. It operates in a matrix, with the group managed and reported by geographic grouping, reflecting the inter-dependency between recycling, paper, and packaging. The company was founded in 1940 and is headquartered in London, the United Kingdom.</p>
EDP Renovaveis	<p>EDP Renovaveis SA operates as a renewable energy company, which engages in the development, construction, and operation of wind farms and solar plants. The firm generates energy from renewable sources in several locations. It operates through the following geographical business segments: Europe, North America, and Brazil. The Europe segment consists of operations in Spain, Portugal, Belgium, France, Italy, Netherlands, Poland, Romania, and the United Kingdom. The North America segment comprises EDPR North America and EDPR Canada Group companies. The Brazil segment deals with EDPR Brazil Group companies. The company was founded on December 4, 2007 and is headquartered in Oviedo, Spain.</p>

ENN Energy Holdings	ENN Energy Holdings Ltd. engages in the gas supply business. It operates through the following segments: Gas Connection, Sales of Piped Gas, Vehicle Gas Refuelling Stations, Wholesale of Gas, Sales of Other Energy, Sales of Gas Appliances, and Sales of Material. The company was founded by Yu Suo Wang and Bao Ju Zhao in 1992 and is headquartered in Langfang, China.
Ensyn	Ensyn is a second-generation biofuels company which extracts bio-oils and value-added chemicals from biomass using proven technology based around pyrolysis. The company has strong strategic partnerships with UOP Honeywell and Chevron in the energy sector and Fibria in the forestry space, and is making good progress on executing commercial projects. The company is headquartered in Ottawa, Ontario.
Eurofins Scientific	Eurofins Scientific SE is engaged in the bioanalytical testing of food and pharmaceuticals products. Its services include food and feed testing, biopharmaceutical, genomic pharmaceutical, agrosience, forensic, and product and environment testing. The company was founded by Gilles Martin in 1987 and is headquartered in Luxembourg.
Franklin Electric	Franklin Electric Co., Inc. engages in the development, manufacture, and distribution of water and fuel pumping systems. It operates through the following business segments: Water Systems, Fuelling Systems, and Other. The Water Systems segment designs, manufactures, and sells water pumping systems, submersible motors, pumps, electronic controls, and related parts and equipment. The Fuelling Systems segment produces and markets fuel pumping, fuel containment, and monitoring and control systems. It also offers pumps, pipe, sumps, fittings, vapor recovery components, electronic controls, monitoring devices, and related parts and equipment. The Other segment includes the unallocated corporate expenses and inter-company eliminations. The company was founded by Edward J. Schaefer and T. Wayne Kehoe in 1944 and is headquartered in Fort Wayne, IN.
Generac Holdings	Generac Holdings, Inc. designs and manufactures power generation equipment and other engine powered products serving the residential, light commercial and industrial markets. It designs, manufactures, sources and modifies engines, alternators, transfer switches and other components, such as light towers, pumps and power washers for the residential, light commercial, industrial and construction markets. The company operates through the following segments: Domestic and International. The Domestic segment includes the legacy generac business. The International segment includes the ottomotores, tower light and pramac acquisitions. Both segments designs and manufactures power generation equipment and other engine powered products. Generac Holdings was founded in 2006 and is headquartered in Waukesha, WI.
HollySys Automation Technologies	HollySys Automation Technologies Ltd. engages in the provision of automation and control technologies and applications. It operates through the following segments: Industrial Automation, Rail Transportation, and Mechanical and Electrical Solution. The Industrial Automation segment consists of third-party hardware-centric products such as instrumentation and actuators; its proprietary software-centric distributed control systems and programmable logic controller; and valued-added software packages. The

	<p>Rail Transportation segment includes train control centre and automation train protection. The Mechanical and Electrical segment provides design, engineering, procurement, project management, construction and commissioning, and maintenance related services to railway transportation. The company was founded by Chang Li Wang and An Luo in March 1993 and is headquartered in Beijing, China.</p>
Horiba	<p>Horiba Ltd. engages in the manufacture and sale of instruments and systems for various industrial applications. It operates through the following segments: Automotive Test Systems, Process & Environmental Instruments & Systems, Semiconductor Instruments & Systems, Medical-Diagnostic Instruments & Systems, and Scientific Instruments & Systems. The Automotive Test Systems segment sells emission measurement systems, automotive emission analysers, onboard emission measurement systems, driveline test systems, engine test systems, break test systems, and drive recorders. The Process & Environmental Instruments & Systems segment manufactures stack gas analysers, water quality analysis and examination systems, air pollution analysers, and environmental radiation monitor. The Semiconductor Instruments & Systems segment includes mass flow controllers, chemical concentration monitors, reticle/mask particle detection systems, and residual gas analysers. The Medical-Diagnostic Instruments & Systems segment offers equipment for blood sample analysis. The Scientific Instruments & Systems segment sells particle-size distribution analysers, x-ray fluorescence analysers, Raman spectrophotometers, spectrometers, gratings, and pH meters. The company was founded by Masao Horiba on October 17, 1945 and is headquartered in Kyoto, Japan.</p>
Itron	<p>Itron, Inc. is a technology and services company, which dedicates to the resourceful use of electricity, natural gas, and water. It provides comprehensive solutions that measure, manage, and analyse energy and water use. The company solutions include standard meters and next-generation smart metering products, metering systems, and services, which ultimately empower and benefit consumers. It operates through the following segments: Electricity, Gas, and Water. The company was founded in 1977 and is headquartered in Liberty Lake, WA.</p>
Kemira Oyj	<p>Kemira Oyj engages in the provision of water quality and quantity management solutions, which improves energy, water, and raw material efficiency. It operates through the following segments: Paper, Municipal and Industrial, Oil and Mining, and ChemSolutions. The Paper segment provides customers with products and product packages that improve profitability, raw material and energy efficiency, and promote sustainable development. The Municipal and Industrial segment offers water treatment chemicals for municipalities and industrial customers. The Oil and Mining segment includes chemical extraction and process solutions for oil and mining industries. The ChemSolutions segment offers chemical products and customer-driven solutions to the food, feed, pharmaceutical and chemical industries. The company was founded in 1920 and is headquartered in Helsinki, Finland.</p>

Kingspan	Kingspan Group Plc engages in the manufacture of insulated panels, rigid insulation boards, architectural facades, raised access floors, and environmental solutions. It operates through the following segments: Insulated Panels, Insulation Boards, Environmental, and Access Floors. The Insulated Panels segment refers to the production of insulated panels, structural framing, and metal facades. The Insulation Boards segment provides rigid insulation boards, building services insulation and engineered timber systems. The Environmental segment is related to energy storage solutions, water and microwind systems and all other relates activities. The Access Floors segment include raised access floors, and data centre storage solutions. The company was founded by Brendan P. Murtagh and Eugene Murtagh in 1965 and is headquartered in Kingscourt, Ireland.
LEM Holding	LEM Holding SA engages in the provision of solutions for measuring electrical parameters. It operates through the Industry and Automotive segments. The Industry segment involves in developing, manufacturing, and selling of electronic components transducers for the measurement of current and voltage of industrial applications. The Automotive segment develops, manufactures and sells transducers for applications in automotive markets. The company was founded in February 1972 is headquartered in Fribourg, Switzerland.
Lennox International, Inc.	Lennox International, Inc. engages in designing, manufacturing, and marketing of products for heating, ventilation, air conditioning, and refrigeration. It operates through the following segments: Residential Heating and Cooling, Commercial Heating and Cooling, and Refrigeration. The Residential Heating and Cooling segment involves in manufacturing and marketing of furnaces, air conditioners, heat pumps, packaged heating and cooling systems, equipment and accessories. The Commercial Heating and Cooling segment offers manufacturing and selling unitary heating and cooling equipment used in light commercial applications. The Refrigeration segment includes manufacturing and selling of equipment for commercial refrigeration market such as condensing unit, unit coolers, fluid, coolers, air cooled condensers, supermarket display cases, and systems. The company was founded by Dave Lennox in 1895 and is headquartered in Richardson, TX.
Lenzing	Lenzing AG engages in the production and marketing of botanic cellulose fibres. It operates through the following segments: Fibres, Lenzing Technik, and Other. The Fibres segment manufactures botanic cellulose fibers and markets them under the brands Lenzing Visacose, Lenzing Modal and TENCEL. The Lenzing Tenchnik segment operates in the field of mechanical and plant engineering and offers engineering services. The Other segment comprises of the business activities of Dolan GmbH, Kelheim, Germany, which manufactures specialty products from plastic polymers, particularly acrylic fibers; and European Carbon Fiber GmbH, Kelheim, Germany, which produces precursor for carbon fibers. The company was founded in 1938 and is headquartered in Lenzing, Austria.
Newalta Corporation	Newalta Corp. provides engineered environmental solutions that enable customers to reduce disposal, enhance recycling, and recover resources from industrial residues. It markets its products to oil, natural

	<p>gas, petrochemical, refining, lead, manufacturing and mining industries. The company operates through the Heavy Oil and Oilfield segments. The Heavy Oil segment processes oilfield-generated wastes, including treatment, water disposal, salt cavern disposal, landfilling, and the sale of recovered crude oil; as well as provides onsite services using centrifugation or other processes for heavy oil producers involved in heavy oil mining and in site production. The Oilfield segment includes the processing of oilfield-generated wastes, including treatment, water disposal, clean oil terminalling, and landfilling; as well as the sale of recovered crude oil and the supply and operation of drill site processing equipment, including solids control and drill cuttings management. It is also comprised of environmental services, including environmental projects, drilling waste management services, and site remediation. The company was founded on July 15, 1980 and is headquartered in Calgary, Canada.</p>
NIBE Industrier	<p>NIBE Industrier AB engages in the manufacture of products for both household and commercial use. It operates through the following business areas: NIBE Element, NIBE Climate Solutions, and NIBE Stoves. The NIBE Element business area manufactures components and solutions for measuring, controlling, and heating applications. The NIBE Climate Solutions business area offers indoor climate comfort products including heating, cooling, heat recovery, and hot water for homes and apartment blocks. The NIBE Stoves business area consists of stoves, chimney systems, and other accessories. The company was founded in 1989 and is headquartered in Markaryd, Sweden.</p>
NORMA Group	<p>NORMA Group SE engages in the provision of engineered joining technology solutions. The company operates through the following segments: Europe, Middle East and Africa; the Americas; and Asia-Pacific. Its product portfolio includes quick connectors, hose clamps, retaining clamps and pipe couplings. The company was founded by Berthold Hummel and Giovanni Russo on February 21, 2006 and is headquartered in Maintal, Germany.</p>
Ormat Technologies	<p>Ormat Technologies, Inc. is a holding company, which engages in the provision of renewable energy. It operates through the Electricity and Products segments. The Electricity segment develops and installs geothermal power plants. The Product segment manufactures and sells equipment for energy-based electricity generation, remote power units and power generating units. The company was founded in 1965 and is headquartered in Reno, NV.</p>
Philips Lighting	<p>Philips Lighting NV engages in provision, development, manufacture, and application of lighting products, systems, and services. It operates through the following segments: Lamps. LED (Light-Emitting Diode), Professional, Home, and Others. The company was founded by Gerard Leonard Philips and Anton Frederik Philips in 1891 and is headquartered in Eindhoven, Netherlands.</p>
Porvair	<p>Porvair Plc develops designs and manufactures specialist filtration and separation equipment. It operates its business through the following segments: Metals Filtration and Microfiltration. The Metals Filtration segment designs and manufactures porous ceramic filters for the filtration of molten metals. This segment</p>

	<p>serves the global aluminium, North American Free Trade Agreement iron foundry and super-alloys markets. The Microfiltration segment designs and manufactures a broad range of specialist filtration equipment for application in aerospace, energy, bioscience, water and industrial applications. It serves the aviation, environmental laboratory, and energy & industrial markets. The company was founded in 1982 and is headquartered in King's Lynn, the United Kingdom.</p>
Power Integrations	<p>Power Integrations, Inc. designs, develops and markets analog and mixed-signal integrated circuits and other electronic components and circuitry used in high-voltage power conversion. Its products are used in power converters that convert electricity from a high-voltage source to the type of power required for a specified downstream use. The company's integrated circuits and diodes enable compact, energy-efficient AC-DC power supplies for a range of electronic products including mobile devices, TVs, PCs, appliances, smart utility meters and LED lights. Power Integrations was founded on March 25, 1988 and is headquartered in San Jose, CA.</p>
PTC, Inc	<p>PTC, Inc. develops and provides software-based product management and development solutions. It operates through the following segments: Solutions Group, IoT Group and Professional Services. The Solutions Group segment includes license, subscription, support and cloud services revenue for core CAD, PLM and SLM products. The IoT Group segment includes license, subscription, support and cloud services revenue for IoT, analytics and augmented reality solutions. The Professional Services segment includes consulting, implementation and training revenue. The company was founded in 1985 and is headquartered in Needham, MA.</p>
Pure Technologies	<p>Pure Technologies Ltd. engages in the development and application of technologies for inspection, monitoring and management of physical infrastructure, including water and hydrocarbon pipelines, buildings and bridges. The company's technologies and services consist of: proprietary monitoring equipment for pipelines, bridges and structures; technical services, including inspection, leak detection and condition assessment and engineering services in areas related to asset management, primarily in the area of pipeline condition assessment; for water and wastewater infrastructure. It markets products under the following brand names: SoundPrint, SoundPrint Acoustic Fiber Optic, P-Wave, SmartBall, Sahara, PipeDiver, PureRobotics, EMTEK, PureEM and PureMFL. The company was founded by James E. Paulson and Peter O. Paulson on December 18, 1995 and is headquartered in Calgary, Canada.</p>
Rayonier	<p>Rayonier, Inc. is a real estate investment trust, which engages in investment in timberlands. It operates through the following segments: Southern Timber, Pacific Northwest Timber, New Zealand Timber, Real Estate, and Trading. The Southern Timber, Pacific Northwest Timber and New Zealand Timber segments reflect all activities related to the harvesting of timber and other value-added activities, such as recreational licenses, within each respective geography. The Real Estate segment reflects all U.S. land sales, which are reported in the following sales categories: Improved Development, Unimproved</p>

	Development, Rural, Non-Strategic and Timberlands, and Large Dispositions. The Trading segment reflects the log trading activities that support New Zealand operations. The company was founded in 1926 and is headquartered in Jacksonville, FL.
Ricardo Plc	Ricardo Plc engages in the provision of technology, engineering, and consulting services. It operates through the following business segments: Technical Consulting and Performance Products. The Technical Consulting segment develops and implements engineering and environmental projects. The Performance Products segment manufactures, assembles, and sells engines, transmissions, electric motors and generators, battery packs, and fuel cell systems. The company was founded by Harry Ricardo in 1915 and is headquartered in Shoreham-by-Sea, the United Kingdom.
Rinnai Corporation	Rinnai Corp. engages in the development, manufacture and sale of thermal energy equipment and parts. It provides products for kitchen, bathroom, living room, toilet, laundry, changing rooms, and restaurants. Its operations are carried out through the following segments: Japan, America, Australia, China, Korea, Indonesia, and Others. The Others segment includes Taiwan, Thailand, Vietnam, New Zealand, and Brazil. The company was founded by Hidejiro Naito and Kanekichi Hayashi on September 1, 1920 and is headquartered in Nagoya, Japan.
RPS Group	RPS Group Plc provides environmental consultancy services including scientific, planning and design advice to customers in the commercial and government sectors. It operates its business through the following segments: Energy, Built & Natural Environment (BNE) and Australia Asia Pacific. The Energy segment includes integrated technical, commercial and project management support and training in the fields of geoscience, engineering, health, safety and environment to the oil and gas sector. The Built & Natural Environment segment provides consultancy services to many aspects of the property, infrastructure development and management sectors, which include planning, urban design and regeneration, environmental assessment and management, transport and infrastructure, architecture and landscape, engineering and surveying. The Australia Asia Pacific segment manages the BNE and Energy services. The company was founded in 1970 and is headquartered in Abingdon, the United Kingdom.
Sensata Technologies	Sensata Technologies Holding NV engages in the development, manufacturing, and sale of sensors and controls. It operates through the following segments: Performance Sensing and Sensing Solutions. The Performance Sensing segment manufactures pressure, temperature, speed, position sensors, and electromechanical sensor products used in subsystems of automobiles and heavy on- and off-road vehicles. The Sensing Solutions segment offers a variety of control products used in industrial, aerospace, military, commercial, medical device, and residential markets, as well as sensors used in aerospace and industrial products. The company was founded on December 22, 1988 and is headquartered in Hengelo, Netherlands.

Spirax-Sarco	Spirax-Sarco Engineering Plc engages in the provision of industrial and commercial steam systems, electrical thermal energy solutions and niche peristaltic pumps and associated fluid path technologies. It operates its business through the following segments: Steam Specialties and Watson-Marlow. The Steam Specialties segment supplies engineered solutions for the design, maintenance and operation of efficient industrial and commercial steam systems. The Watson-Marlow segment provides peristaltic and selective niche pumps and systems, specializing not only in the design and manufacture of the most advanced pumps and tubing, but also in the application of those pumps to its customer's processes. The company was founded in 1888 and is headquartered in Cheltenham, the United Kingdom.
SUEZ	SUEZ SA provides services for the treatment, production and distribution of drinking water. It also offers collection and processing of non-hazardous and hazardous waste, except for nuclear waste and the recycling of waste. The firm operates through the following business segments: Waste Europe, Water Europe, International, and Other. The Waste Europe segment comprises of waste collection and treatment services for local authorities and industrial clients. The International segment is the area in which the group is expanding its business, depending on the opportunities that may arise, in the areas of water, waste and engineering services with a special focus on risk-management resulting from specific local environments by setting up partnerships, entering into hedges, and limiting invested capital or other investments in highly regulated environments. The other segment is mainly made up of holding companies. The company was founded on November 9, 2000 and is headquartered in Paris, France.
SunPower	SunPower Corp. engages in the design, manufacture, and deliver of solar panels and systems. It operates through the following segments: Residential, Commercial, and Power Plant. The Residential segment refers to the sales of solar energy solutions to residential end customers through a variety of means. The Commercial segment is the sales of solar energy solutions to commercial and public entity end customers. The Power Plant segment is comprised of large-scale solar products and systems business. The company was founded by Thomas L. Dinwoodie, Robert Lorenzini and Richard M. Swanson in April 1985 and is headquartered in San Jose, CA.
Thermax	Thermax Ltd. provides engineering solutions to the energy and environment sectors. It provides essential utilities, which include heating, cooling, water treatment, chemicals and power, for industrial production. The company also offers critical support in waste management and product recovery. It operates through the following segments: Energy and Environment. The Energy segment products include boilers and heaters, absorption chillers, heat pumps and power plants. The Environment segment products include air pollution control equipment and systems, water and waste recycle plants, ion exchange resins and performance chemicals. The company was founded by A. S. Bhatena in 1966 and is headquartered in Pune, India.

TOMRA Systems	Tomra Systems ASA engages in the provision of sensor-based solutions. It operates through the following segments: Collection Solutions, Sorting Solutions, and Group Functions. The Collection Solutions segment offers reverse vending and material recovery. The Sorting Solutions segment provides optical sorting systems to the food, recycling, and mining businesses. The Group Functions segment refers to the corporate activities of the group. The company was founded by Petter Sverre Planke and Tore Planke on April 1, 1972 and is headquartered in Asker, Norway.
Trimble	Trimble, Inc. engages in the provision of providing positioning, wireless and software technology solutions. It operates through the following segments: Engineering and Construction; Field Solutions; Mobile Solutions; and Advanced Devices. The Engineering and Construction segment serves customers working in architecture, engineering, construction, surveying, natural resources and government. The Field Solutions segment includes providing of solutions for the farming, government and consumer markets, with its products focused on agriculture and geographic information systems. The Mobile Solutions segment engages in transportation and logistics and field service management business. The Advanced Devices segment comprises of embedded technologies, timing, applanix, trimble outdoors, military and advanced systems and thingmagic businesses. The company was founded in 1978 by Charles Robert Trimble and is headquartered in Sunnyvale, CA.
Umicore	Umicore engages in the materials technology business. It operates through the following business segments: Catalysis, Energy and Surface Technologies, Recycling, and Corporate. The Catalysis segment comprises of automotive catalysts and precious metals chemistry business units. The Energy and Surface Technologies segment includes cobalt and specialty materials, electro-optic materials, electroplating, rechargeable battery materials and thin film products business units. The Recycling segment offers precious metals refining, jewellery and industrial metals, precious metals management, technical materials, and platinum engineer materials. The Corporate segment covers corporate activities, shared operational functions, and group's research and development unit. The company was founded on July 7, 1904 and is headquartered in Brussels, Belgium.
United Natural Foods	United Natural Foods, Inc. engages in the distribution of natural, organic, and specialty foods and related products. It operates through the Wholesale and Other segments. The Wholesale segment distributes nutritional supplements, personal care items and organic products. The Others segment engages in other activities of the firm. It offers food and non-food, frozen, perishables, bulk, body care products and supplements. The company was founded by Michael S. Funk in 1996 and is headquartered in Providence, RI.
Vestas Wind Systems	Vestas Wind Systems A/S engages in the development, manufacture, sale, and maintenance of wind power plants. It operates through the Project and Service business segments. The Project segment contains sales of wind power plants and wind turbines. The Service segment includes sale of service

	contracts, spare parts, and related activities. The company was founded by Smith Hansen and Peder Hansen in 1945 and is headquartered in Aarhus, Denmark.
Watts Water Technologies	Watts Water Technologies, Inc. engages in the manufacture and provision of products for water conservation, safety, and flow control. It operates through the following geographic segments: Americas, EMEA, and Asia Pacific. Its services include plumbing and flow control solutions, water quality and conditioning, water reuse and drainage, heating, ventilation, and air conditioning, and municipal waterworks. The company was founded in 1985 and is headquartered in North Andover, MA.
Welbilt, Inc.	Welbilt, Inc. operates as a commercial foodservice equipment company. It designs, manufactures and supplies food and beverage equipment for the global commercial foodservice market. The company was founded on July 20, 2015 and is headquartered in New Port Richey, FL.
Xinyi Solar Holdings	Xinyi Solar Holdings Ltd. engages in the manufacture and sale of solar photovoltaic glasses. The company offers two principal solar glass products to its customers: ultra-clear photovoltaic raw glass and ultra-clear photovoltaic processed glass. Its ultra-clear photovoltaic raw glass is a semi-finished patterned glass product that can be used for the production of ultra-clear photovoltaic processed glass or sold to other glass manufacturers or processing companies for further processing; and ultra-clear photovoltaic processed glass is mainly used in solar modules based on crystalline silicon technology. The company was founded on December 12, 2013 and is headquartered in Wuhu, China.
Xylem, Inc.	Xylem, Inc. engages in the design, manufacture and application of highly engineered technologies for the water industry. It provides water and wastewater applications with a broad portfolio of products and services addressing the full cycle of water, from collection, distribution and use to the return of water to the environment. It operates through two business segments: Water Infrastructure and Applied Water. The Water Infrastructure segment focuses on the transportation, treatment and testing of water, offering a range of products including water & wastewater pumps, treatment & testing equipment, and controls & systems. This segment brands include Flygt, Wedeco, Godwin Pumps, WTW, Sanitaire, YSI and Leopold. The Applied Water segment encompasses the uses of water and focuses on the residential, commercial, industrial and agricultural markets. Its products include pumps, valves, heat exchangers, controls and dispensing equipment. The company was founded on May 4, 2011 and is headquartered in White Plains, NY.
